EDUCATION

Northeastern University

Master of Science in Computer Science, Khoury College of Computer Sciences – GPA: 3.33/4.0

Boston, MA

Expected May 2028

PSG College of Technology

Bachelor of Engineering in Computer Science Engineering

Coimbatore, India

May 2024

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot, TensorFlow, PyTorch, Salesforce Lightning

Databases: MySQL, PostgreSQL, MongoDB, Salesforce SOQL

Tools: Git, IntelliJ IDEA, Visual Studio Code, Docker

WORK EXPERIENCE

TVS Credit Services Limited

Software Developer

Chennai, India

June 2024 – Nov 2025

- Architected and launched the Cross-Sell Personal Loan (CSPL) Portfolio in Salesforce across India, cutting average case logging time from 60 to 20 minutes and raising agent case throughput from 3 to 20+ per day.
- Trained 10+ call center agents on-site and coordinated with external vendors to drive Salesforce adoption across customer case-logging workflows.
- Provided ongoing production support for the CSPL portfolio, collaborating with QA teams to identify and resolve post-launch issues.

TVS Credit Services Limited

Graduate Engineer Trainee

Chennai, India

Feb 2024 – May 2024

- Built backend logic for the Loan Origination Services (LOS) system in Salesforce, supporting loan application intake and processing workflows.
- Completed intensive hands-on Salesforce training to build domain expertise in financial-services case management and workflow automation.

Infotech Consultancy

Cybersecurity Intern

Hyderabad, India

May 2023 – July 2023

- Monitored network security, analyzed logs, and performed vulnerability assessment and penetration testing using Nmap, OWASP ZAP, and Burp Suite.
- Supported incident response and malware analysis with SIEM tools, applying ISO 27001 and NIST frameworks alongside secure development practices and basic threat modeling.

PROJECTS

Nexus Gaming Hub | React.js, Node.js, MySQL, Express

- Built a full-stack gaming platform centralizing digital storefronts, esports tournament tracking, and social guild management.
- Designed a relational MySQL schema of 11 interconnected entities, including a self-referencing friend-request relationship, with Stored Procedures, Views, and Triggers secured by Prepared Statements against SQL injection.
- Built a React frontend with Role-Based Access Control (RBAC), delivering distinct dashboards for Admins to manage catalogs and Players to engage in community features.

Conditional GANs for Image Translation | Python, TensorFlow, PyTorch

- Led a 4-member research team building Conditional GANs for multi-domain image translation using a U-Net generator with skip connections and a PatchGAN discriminator.
- Achieved high-fidelity image synthesis across 5 datasets, including Google Maps and Cityscapes, with 95% discriminator accuracy.
- Published a technical report on conditional adversarial networks for structured image-to-image translation.

TaskFlow API | Java, Spring Boot, PostgreSQL, Docker

- Built a Spring Boot REST API with 15+ endpoints for multi-user project and task management, featuring JWT authentication and a two-tier RBAC model with global admin roles and project-scoped owner/member roles enforced at the service layer.
- Designed a relational PostgreSQL schema across 5 entities (Users, Projects, ProjectMembers, Tasks, Comments), supporting pagination, filtering, and keyword search on tasks via JPA Specifications.
- Validated auth and access-control logic with 17 automated tests (JUnit/Mockito unit tests and Testcontainers integration tests against a real Postgres instance), and containerized the app with Docker behind a GitHub Actions CI/CD pipeline running tests and building images on every push.

CERTIFICATIONS

Salesforce Certified Agentforce Specialist – Salesforce, Nov 2025

Salesforce Certified AI Associate – Salesforce, Oct 2024
